KEY COMPETENCIES

Flutter	Dart	Firebase	NodeJS

WORK EXPERIENCE

Client App Link

Flutter Developer at Urban Culture (Startup)   **July 2023 - Present**

- **API Integration and UI Development:** Developed and integrated APIs to fetch and display available service slots in the user interface, ensuring a smooth and informative user experience.
- **Google Maps API Implementation:** Enhanced the application by integrating Google Maps API, allowing users to conveniently select their preferred location for receiving services.
- **Onboarding Screen Design:** Designed and implemented the onboarding process for new partners using the partners' app.
- **Localization Implementation:** Implemented localization in the partners' app to cater to a diverse user base, enhancing the app's accessibility and usability across different regions and languages.
- Through my work at Urban Culture, I have demonstrated strong technical skills in Flutter development, coupled with a keen focus on creating user-centered solutions that enhance convenience and user engagement.
- Spearheaded the development and deployment of a robust API, serving as the backbone for the company's mobile application and admin panel.
- Engineered seamless API integrations that enhanced functionality and user experience across multiple platforms, significantly improving operational efficiency.
- Collaborated closely with cross-functional teams to align the API services with business requirements, ensuring scalability and maintainability of the system.

PROJECTS

Coffee Cafe App   App Screenshots Link

Features:

- **Pre-Ordering System:** Implemented a real-time coffee ordering feature that allows users to place their orders 15 minutes before arriving at the cafe. The system ensures that the coffee is freshly brewed and ready to serve upon the user's arrival.
- **Global Chat System:** Created a global chat room where users can engage in conversations about coffee, life, or anything in between.
- **Personal Chat Option: (Upcoming)** Designed a feature where users can initiate private conversations by clicking on the name appearing on top of the chat bubble in the global chat room.
- **Media Sharing:** Enabled the sharing of images, videos, and documents within the chat system, enriching the communication experience.
- **Notification System: (Upcoming)** Planning to implement real-time notifications to alert users about new messages or order updates.
